PROFILE

Driven by a love for technology and design, I specialize in creating innovative, user-focused web solutions that help businesses thrive.

Projects

StreetFood || [Live Link](#) || [Backend Git Link](#)

Dec-2024 Ongoing

Built a platform to discover and order street food with live tracking, real-time notifications, and chat using React.js, Node.js, MongoDB, and WebSocket.

- Users can directly chat with store owners or delivery men.
- Users will receive live location update
- Designed a dashboard for order management
- Admin can analyze API performance and responses
- Real time notification with React Toast

DevZone || [Live Link](#) || [GitHub Link](#)

Feb-2024 - Upgrading

Developed and managed a comprehensive Community system where users are able to share their thoughts through their posts.

- Users can follow & unfollow each other to see posts.
- Users are able to see personalized category posts.
- Users are able to comment and like their posts.

SwiftlyMail | Team Project | [Live Link](#) |

14 Jan - 8 Mar -2024

Swiftly Mail revolutionizes email management with innovative features, such as disposable email addresses, a responsive chatbot, and a vibrant community forum.

- Users can generate temporary emails.
- Users can receive the incoming emails.
- Designed a user friendly dashboard.
